NATIONALITY: British

## **PARTICULAR EXPERIENCE**

An engineer with considerable experience within the building services industry working in operational, facilities management, health & safety and design fields. Additional experience gained as an electrical Authorised Person and Co-ordinating Authoring Engineer having had responsibility for implementing Safe Systems of Work for both British Airways and the BBC..

## **EMPLOYMENT HISTORY**

### **Technical Support Associates (2000 - now)**

Technical consultant, advising on M&E Services and Health and Safety issues. Currently reviewing control of Contractors and operational activities for the BBC, West London, comprising approx. 500,000 m<sup>2</sup> property portfolio. Providing additional assistance on other M&E issues.

### **British Airways**

The bulk of my work experience was at British Airways where I held a number of key positions within the Property Facilities Management team.

I took the opportunity for voluntary severance and early retirement from British Airways in early 2000. I gained valuable experience, particularly in the Operation and Maintenance of a diverse property portfolio, including extremely important operational buildings such as Airport Terminals, Catering Centres, hangars, Data Centres, etc.

I have acted in the role of Project Manager, delivering a wide range of projects including Executive Airport Lounges, Water Treatment Plants and Major Building Refurbishments.

At the peak of staff directly employed at British Airways (1987/1991), I managed a team of 109 staff, including engineers and/or service providers, with a budget in excess of £12m per annum.

1997-2000	Property Technical Support Manager and Authorising Engineer for Safe Systems of Work.
1994-1997	Property Waste Manager and Authorising Engineer for Safe Systems of Work.
